Originally designed for big wall climbing the aid climbing daisy chain is nothing more than a standard sling that's sewn together to produce dozens of short loops that allow the user to adjust the length of the sling. One end of the daisy is lark's footed directly into your belay loop (not into the waist and leg loops), and the other end has a screwgate clipped into the end. On big walls, the daisy chain is used as an extra arm, with two being employed to connect aiders and jumars to the harness. For non-big wall use the daisy chain is used as an adjustable tether, allowing the climber to quickly clip in and out of the belay independently from the rope, used as an abseil sling, or French free and jumaring.
