The global Air Compressor Lubricants market size is predicted to grow from US\$ 6200 million in 2025 to US\$ 8934 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

Air compressor lubricants are specialized oils formulated to reduce friction, dissipate heat, seal internal clearances, and prevent wear and corrosion in air compressor systems, including rotary screw, reciprocating, and centrifugal compressors. These lubricants are critical for maintaining efficiency, extending equipment lifespan, and ensuring stable operation under high temperature and pressure conditions. From a value chain perspective, upstream includes base oils (mineral oil, synthetic oil such as PAO, ester, PAG), additives (anti-wear, anti-oxidation, anti-foam), and chemical intermediates; midstream involves blending, formulation engineering, performance testing, and packaging; downstream demand comes from manufacturing plants, oil & gas facilities, power generation, construction, and service providers responsible for compressor maintenance. In 2025, the average selling price is approximately US\$3,250 per ton, with global consumption reaching about 1.95 million tons. The industry maintains gross margins of 18%-32%, supported by formulation know-how, brand value, and recurring replacement demand.

United States market for Air Compressor Lubricants is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
