Air Conditioner With Outdoor Air System refers to an air conditioner with a fresh air system that can send outdoor fresh air into the room. It can discharge indoor carbon dioxide and other polluted gases, and transport outdoor fresh air into the room after a series of filtration and sterilization treatment to achieve the purpose of purifying indoor air.

Air conditioners with outdoor air systems, commonly known as '????' in Chinese, are rapidly emerging within the air conditioning industry. As people's awareness of indoor air quality grows, these systems, which introduce fresh outdoor air into indoor spaces, filtering and purifying it before recirculation, have garnered increasing attention from consumers. The market share of these air conditioners is steadily expanding, particularly in sectors like commercial offices and the restaurant industry. Their specific uses encompass providing healthier indoor environments, reducing indoor pollutant concentrations, and effectively lowering allergen presence, thereby meeting the demand for comfortable living and working spaces.
