Air conditioning hoses, also referred to as A/C hoses, are a crucial component of automotive or HVAC (heating, ventilation, and air conditioning) systems. These hoses are responsible for transporting refrigerant, which is the key substance used to cool or dehumidify the air in air conditioning systems. The primary function of air conditioning hoses is to transfer refrigerant between different components of the air conditioning system, such as the compressor, condenser, evaporator, and receiver/drier. The hoses are designed to withstand the high pressure and temperature fluctuations that occur within the air conditioning system.
