Air cushion foundation is a sponge air cushion type powder cream, a new concept liquid foundation that can breathe. Unlike the traditional powder foundation concept, the cushion foundation is a facial beauty product that can create a nude makeup effect. Its role is to conceal, adjust skin tone, and hide pores. The product design is easy to carry, and you can quickly apply and repair makeup anytime, anywhere. Simulating the principle of honeycomb storage, the BB cream is locked in a sponge air cushion powder core with thousands of fine holes.
