An Air Fed Welders Mask is a specialized respiratory protective device worn by welders to protect them from harmful fumes, gases, and particulates generated during the welding process. This mask comprises a powered air-purifying respirator (PAPR) fitted with a welding helmet and air supply hose. The PAPR contains a motor and filter system that draws contaminated air through the filter and supplies breathable air into the mask. It provides clean air to the welder and prevents the inhalation of hazardous airborne particles, fumes, or gases that could cause respiratory problems.
