Airbag fiber, also known as airbag fabric, is a type of textile material used in the manufacturing of automotive airbags. It is designed to be highly durable and tear-resistant, while also being lightweight and flexible. Airbag fiber is typically composed of synthetic materials, such as nylon or polyester, which have excellent tensile strength and are resistant to abrasion, puncture, and heat. The fibers are woven together to create a sturdy textile material that can resist the forces and impact of an automobile collision. The airbag fiber is used to construct the airbag module, which includes the airbag cushion and the inflator system that rapidly inflates the airbag during an impact to protect vehicle occupants from injuries. Airbag fibers play a critical role in ensuring the safety and reliability of automotive airbags.
