The global Airbag market size is predicted to grow from US\$ 12710 million in 2025 to US\$ 14200 million in 2031; it is expected to grow at a CAGR of 1.9% from 2025 to 2031.

An airbag is a vehicle occupant-restraint system using a bag designed to inflate extremely quickly, then quickly deflate during a collision. It consists of the airbag cushion, a flexible fabric bag, an inflation module, and an impact sensor. The purpose of the airbag is to provide a vehicle occupant a soft cushioning and restraint during a crash event. It can reduce injuries between the flailing occupant and the interior of the vehicle.

The airbag provides an energy-absorbing surface between the vehicle's occupants and a steering wheel, instrument panel, body pillar, headliner, and windshield. Modern vehicles may contain multiple airbag modules in various configurations, including, driver, passenger, side-curtain, seat-mounted side-impact, knee bolster, inflatable seat belt, front right- and left-side sensor, and pedestrian airbag modules.

The top four manufacturers of airbags in the world are Autoliv, Joyson Safety Systems, ZF-TRW and Toyota Gosei.
