The report requires updating with new data and is sent in 48 hours after order is placed.

An increasing trend to adopt the more electric aircraft (MEA) concept has resulted in an increasing number of electronic components replacing the traditional mechanical or hydraulic components. This has resulted in an increased power requirement for electronic components, further increasing the demand for power generation systems and would be the major driver for the growth of the aircraft actuator market.

Among all the electronic components types, converters accounted for the largest market share in 2017 and the market for the same is estimated to grow at the highest CAGR between 2018 and 2025. Due to the emergence of the more electrical aircraft concept, the requirement of electricity generation and distribution in aircraft would increase significantly; this would give rise to the associated components market including converters.

According to this study, over the next five years the Aircraft Actuator market will register a xx% CAGR in terms of revenue, the global market size will reach US\$ xx million by 2023, from US\$ xx million in 2017. In particular, this report presents the global market share (sales and revenue) of key companies in Aircraft Actuator business, shared in Chapter 3.
