Formed couplings are available in an extensive variety of cross-section with numerous latch styles, including T-bolt, quick-release T-bolt, and slotted, forged-trunnion designs. Designed for aircraft bleed air and environmental ducting. Available in all stainless steels, and many superalloys including 15-3-3-3 titanium for maximum strength at minimum weight. Rigid machined couplings meet both commercial military requirements and the AS1895 standard. These couplings are used with metal seals and machined couplings in high-pressure and high-temperature aircraft ducting applications such as jet engine bleed air systems
