The report requires updating with new data and is sent in 48 hours after order is placed.

The global Aircraft Engine Controller market size is projected to grow from US\$ 111.5 million in 2022 to US\$ 148.2 million in 2029; it is expected to grow at a CAGR of 4.1% from 2023 to 2029.

In modern aircraft, Full Authority Digital Engine Control (FADEC) makes flying easier, safer, more efficient and more predictable. By continuously monitoring and automatically adjusting the aircraft's engine performance and related standards during each flight, FADEC enables pilots to focus their energy and attention on the environment in which they are flying and the safety of their passengers or cargo.

FADEC utilizes the limit capability of the digital electronic control system to complete all the tasks stipulated by the system, and is an inevitable control form for high-performance aircraft and integrated aircraft control
