Aircraft Exhaust systems are a vital part of the aircraft propulsion mechanism. The exhaust system assembly in aircrafts is usually constituted with exhaust mufflers, exhaust stacks, tailpipes, risers, wyes and turbo exhaust transitions. An aircraft exhaust system is a multifaceted system unlike Others exhaust systems. Aircraft exhaust systems are designed to take care of the engine NHS (noise, vibration and harshness) and prevent melting by handling internal and external temperature variances. The main purpose of an exhaust system in an aircraft is to take the heat and gases away from the engine, which can cause a fire onboard and prevent leakage of poisonous gases into the cockpit.

The global Aircraft Exhaust System market size is projected to grow from US\$ 624.2 million in 2023 to US\$ 853.1 million in 2030; it is expected to grow at a CAGR of 4.6% from 2024 to 2030.

LP Information, Inc. (LPI) ' newest research report, the "Aircraft Exhaust System Industry Forecast" looks at past sales and reviews total world Aircraft Exhaust System sales in 2023, providing a comprehensive analysis by region and market sector of projected Aircraft Exhaust System sales for 2024 through 2030. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Aircraft Exhaust System.

There are mainly two types of exhaust systems used on aircraft engines - short stack systems and collector systems. Short stack systems are used on low-powered engines that emit less noise. Collector systems, on the Others hand, are used on most large engines as they provide better scope for maintenance. In turbo supercharged engines, engine exhaust gases are collected to run the compressor in the supercharger. Though the existing technologies for aircraft exhaust systems are advanced, there is always scope for improvisation due to the ever rising demand for cleaner exhaust systems from end use sectors.

This report presents a comprehensive overview, market shares, and growth opportunities of Aircraft Exhaust System market by product type, application, key manufacturers and key regions and countries.
