The global Aircraft Headsets and Helmets market size is predicted to grow from US\$ 2107 million in 2025 to US\$ 2979 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

Aviation headsets and helmets are professional protective and communication devices for pilots. Integrated with noise reduction, two-way intercom, anti-noise communication and head protection functions, the helmet cushions impacts and resists airflow and external hazards, while the supporting headset filters cockpit noise, ensures clear crew communication and receives navigation and control tower instructions. Combining flight safety, stable communication and long-wearing comfort, they are widely used in civil aviation, general aviation and military aviation scenarios. Aviation headsets are generally priced between 500 and 900 US dollars per unit, while flight helmets vary greatly in cost. The unit price of military helmets may exceed 100,000 US dollars.
