The global Aircraft Piston Engines market size is predicted to grow from US\$ 67.9 million in 2025 to US\$ 75.9 million in 2031; it is expected to grow at a CAGR of 1.9% from 2025 to 2031.

Aircraft piston engine refers to the reciprocating internal combustion engine which provides aircraft flight power, usually a four-stroke gasoline engine that ignites with a spark plug. The crankshaft turns twice, and each piston moves back and forth four times in the cylinder to complete a cycle. Each movement of the piston is called 'a stroke'. The four strokes are intake, compression, expansion and exhaust. It is mainly composed of crankshaft, connecting rod, piston, cylinder, air separator and casing. Some engines have a reducer at the front to slow down the output shaft. Most engines have a supercharger at the rear of the casing to improve high altitude performance of the engine. Piston aircraft engines are multi-cylinder engines, with at least 4 cylinders and as many as 28. According to the cylinder cooling mode is divided into liquid - cooled engine and air - cooled engine. According to the form of cylinder arrangement is divided into linear engine and star engine. Star air - cooled engines are used more. From the world's first aircraft in 1903 until the end of World War II, all aircraft used piston aeroengines as power units. Since the mid-1940s, gas turbine engines have gradually replaced piston aircraft engines in military aircraft and large civil aircraft. However, low-power piston aircraft engines are more economical than gas turbine engines and are still used in light and low-speed aircraft.

Key manufacturers of global Aircraft Piston Engines market include Lycoming Engines, Continental Motors (AVIC), Rotax, Austro Engine, Limbach Flugmotoren, ULPower Aero

Engines, etc. In 2019, Lycoming Engines and AVIC accounted for market share of about 42% and 31%, which makes them two largest companies of the industry.

North America and Europe rank the first and second places of global market, which accounted for about 61% and 32% of market share in 2019. China is another important consumption area, with a market share of over 5%.
