Aircraft Teardown and Recycling Services refer to the process of disassembling retired or end-of-life aircraft to recover reusable components and materials. This involves systematically removing valuable parts, such as engines, avionics, and landing gear, which can be refurbished, resold, or used as spare parts. The remaining aircraft structure is then recycled, often by recovering metals like aluminum, titanium, and steel. These services aim to minimize environmental impact, maximize material recovery, and support the aviation industry's sustainability efforts. They are essential for reducing waste and ensuring the safe disposal of obsolete aircraft.
