Airport Baggage towing tractors come in a wide variety of sizes and models. They are used to move bag carts, ground power units, lav and water servicing carts. The larger capacity baggage tugs are also used as pushback tugs for commuter aircraft up to 90,000Lb in weight.

The global air travel industry has been expanding, leading to higher passenger traffic and the need for efficient baggage handling systems at airports. This has driven the demand for baggage towing tractors as they play a crucial role in transporting baggage and cargo between the terminal and aircraft. There is a growing emphasis on reducing carbon emissions and environmental impact in the aviation industry. As a result, there is a rising demand for baggage towing tractors with eco-friendly features, such as electric or hybrid power systems. These tractors offer lower emissions, reduced noise levels, and lower operating costs, making them attractive to airports and airlines looking to enhance their sustainability efforts.
