Moving walkway or moving sidewalk, also called as travelator, is a transport system that uses conveyor. The moving walkways move people safely and slowly over a short distance along the ground level or inclined between two floors of the building. Escalators and walkways have similar applications. People walk or stand on the conveyor and it starts to roll. Walkways are installed in pairs with opposite direction of rolling and have moving safety handrails alongside. These handrails roll into end comb-plate as the walkway ends.
