## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The global Airship market size is predicted to grow from US\$ 248 million in 2025 to US\$ 419 million in 2031; it is expected to grow at a CAGR of 9.1% from 2025 to 2031.

Airships are aerospace vehicles that get most of their lifting capability from 'static' lift using gases which are lighter than air, unlike aircraft that fly using the principles of dynamic lift i.e. wings (fixed or rotary). Considering many companies build the airship for renting, in this report we statistic exclude the revenue from renting.

Europe is the largest Airship market with about 51% market share. United States is follower, accounting for about 37% market share.

The key players are Lockheed Martin, Zeppelin Luftschifftechnik, Lindstrand Technologies, Vantage Airship, Airborne Industries, Gefa-Flug etc. Top 3 companies occupied about 75% market share.
