According to our (LP Info Research) latest study, the global Al-Ti Master Alloy market size was valued at US\$ million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Al-Ti Master Alloy is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global Al-Ti Master Alloy market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Al-Ti Master Alloy are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Al-Ti Master Alloy. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Al-Ti Master Alloy market.

The grain refinement of aluminum by addition of Al-Ti and Al-Ti-B master alloys has been widely used and studied in recent years. Much practical and theoretical work has been done to investigate a more effective Al-Ti-B master alloy, while Al-Ti has often been considered as more simple and understandable master alloy. In certain areas, Al-Ti master alloys have been used extensively as an alternative to Al-Ti-B grain refiner.  $TiAl_3$  particle in Al-Ti grain refiner is a more powerful nucleant for  $\alpha$ -Al than any other heterogeneous nucleating particle
