An alkaline ionizer (also known as a water ionizer) is a home appliance which claims to raise the pH of drinking water by using electrolysis to separate the incoming water stream into acidic and alkaline components. The alkaline stream of the treated water is called alkaline water. Proponents claim that consumption of alkaline water results in a variety of health benefits, making it similar to the alternative health practice of alkaline diets. Such claims violate basic principles of chemistry and physiology. There is no medical evidence for any health benefits of alkaline water.

Global Alkaline Ionizers key players include Enagic, Life Ionizers, Nihon Trim Group, Fuji Medical Instruments Mfg, AlkaViva LLC, etc. Global top 5 manufacturers hold a share about 25%.

Asia-Pacific is the largest market, with a share over 45%, followed by North America

and Europe, both have a share over 45 percent.
