Alkaline multi enzyme detergent is a washing product that combines alkaline ingredients and multiple enzyme preparations. In addition to alkaline substances such as sodium hydroxide and sodium carbonate, various enzymes such as protease, lipase, and amylase are also added. Alkaline components can enhance the removal ability of dirt such as oil and protein, while different enzymes have targeted decomposition of specific types of stains: proteases can decompose protein based dirt (such as bloodstains, milk stains, etc.); Lipase can break down oily dirt; Starch enzymes are used to break down starch stains.
