An all-electric refrigerated truck is a vehicle powered entirely by electric batteries that is designed to transport perishable goods while maintaining precise temperature control. Unlike traditional refrigerated trucks that rely on diesel engines or separate fuel-powered refrigeration units, these trucks use electric power for both propulsion and refrigeration. This results in zero tailpipe emissions, reduced noise pollution, and lower operating costs due to decreased reliance on fossil fuels and reduced maintenance needs. All-electric refrigerated trucks are an environmentally friendly solution for urban deliveries and short-haul transportation, supporting sustainability goals and compliance with stricter emission regulations. They are increasingly adopted by logistics and food distribution companies aiming to reduce their carbon footprint and operational expenses.
