An All-Road Bike, also known as a gravel bike, is a versatile and multi-purpose bicycle designed to handle a variety of terrains, offering a balance between road and off-road cycling capabilities. Characterized by a sturdy frame geometry and wider tire clearance than traditional road bikes, the All-Road Bike is well-suited for navigating unpaved surfaces, gravel paths, and rough roads. The frame design typically incorporates features to enhance stability, comfort, and durability, making it ideal for long-distance rides and exploration. All-Road Bikes often feature disc brakes for reliable stopping power, endurance-oriented geometry for comfort during extended rides, and mounting points for racks and accessories, allowing riders to customize their setup for bikepacking or touring adventures. With a more relaxed riding position compared to racing bikes and the ability to accommodate a range of tire sizes, the All-Road Bike is designed to provide a smooth and enjoyable cycling experience across a diverse array of road conditions.
