The global All-Weather VTOL Long-Endurance Fixed-Wing UAVs market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The all-weather vertical take-off and landing long-endurance fixed-wing UAV is a long-endurance fixed-wing UAV that can quickly adapt to different weather conditions, and can perform various detection and special tasks in different weather environments.

In recent years, the civilian drone market has experienced rapid growth, among which industrial drones have become the growth engine. It is estimated that the global civil drone market will grow to 415.727 billion yuan in 2024, and the compound annual growth rate from 2015 to 2024 will reach 43.03%. In addition, it is estimated that the market size of industrial drones will reach 320.820 billion yuan by 2024, accounting for about 77% of the global civilian drone market, up from 25% in 2015. Classified by volume, UAVs can be divided into three categories: large, medium, and small. Small UAVs are usually rotor-type, which can be used as consumer-level UAVs for photography, and can also play a role in industrial-level application scenarios such as agricultural plant protection; medium-sized UAVs are usually in the order of 100 kilograms, and large UAVs weigh more than 600KG. Both types of UAVs are widely used in industrial scenarios. In recent years, due to their advantages in flight time, carrying capacity and ceiling, large UAVs have been widely used in many fields such as artificial weather modification, emergency relief, meteorological monitoring, forest fire prevention, and scientific detection.
