The global Allyl Glycidyl Ether market size is predicted to grow from US\$ 67.54 million in 2025 to US\$ 85.7 million in 2032; it is expected to grow at a CAGR of 3.5% from 2026 to 2032.

Allyl glycidyl ether is an organic compound used in adhesives and sealants and as a monomer for polymerization reactions. It is formally the condensation product of allyl alcohol and glycidol via an ether linkage. Because it contains both an alkene and an epoxide group, either group can be reacted selectively to yield a product where the other functional group remains intact for future reactions.

According to our research, the global epoxy reactive diluents market reached sales of USD 1,138 million in 2022. China is currently the largest consumer market in the world. On the production side, China and Europe are two important production regions. In terms of product type, C12-14 Alcohol Aliphatic Glycidyl Ether occupies an important position.
