Alumina black laser marking machine is a device specially used for high-precision laser marking on the surface of aluminum oxide. By irradiating the surface of aluminum oxide with high energy density of laser beam, the laser marking machine can accurately remove the surface oxide layer and form a dark mark or pattern. The marking process does not require the use of any ink or chemicals, but achieves a high-contrast marking effect through the interaction between laser and material surface. It is widely used in product identification, barcode, QR code and anti-counterfeiting and other fields.
