The global Alumina Emulsion Flocculant market size is predicted to grow from US\$ 798 million in 2025 to US\$ 1150 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

In 2025, global production of alumina emulsion flocculants reached 509,600 tons, with an average price of approximately US\$1,600 per ton. Global annual production capacity for alumina emulsion flocculants was approximately 800,000 tons, with a gross profit margin of approximately 20.7%. Alumina emulsion flocculants are emulsion-type flocculants with alumina (Al₂O₃) as the main component. Utilizing the colloidal properties of alumina, they disperse in water in an emulsion form to aggregate suspended solids and colloidal particles, forming larger flocs and thus promoting solid-liquid separation. The upstream of alumina emulsion flocculants includes alumina precursors and related aluminum salts, pore-forming/surface-modifying additives, and water treatment or dispersion media; the midstream consists of alumina emulsion flocculant manufacturers; and the downstream applications are mainly in water treatment, textiles, and other industries.

The alumina emulsion flocculant market is in a stable expansion phase, primarily driven by increased demand in water treatment and wastewater treatment, continued investment in high-efficiency flocculants in paper and pulp processing, and expanded applications in specific fields such as oilfield water treatment. The market is driven by products that are highly efficient, low-pollution, and widely applicable to environments with varying pH and ionic strengths. Competition among manufacturers focuses on stability, synergy, and green compliance. Challenges include fluctuating raw material prices, increasingly stringent environmental regulations, and rising barriers to entry for customized services and technologies. Overall, with the advancement of environmental

governance and industrial upgrading, alumina emulsion flocculants are expected to achieve steady growth and develop towards intelligent and customized solutions.
