As the whole can is composed of two pieces, it is known as the two-piece can. The Aluminum Beverage Packaging are widely applied for carbonated drinks, beer and drinks with Nitrogen (juice, coffee, tea, sport drinks).

Due to their rising disposable income and changing life style, consumers are inclined towards the usage of canned food and beverages. This is a major factor that drives the metal cans market, globally. Moreover, due to consumers' concern towards the natural

environment increases, the manufacturers are emphasizing towards the production of recyclable metal cans, owing to its higher recycle rate, which in turn becomes a significant driver for the metal can market growth. However, the fluctuating price of the raw material, such as aluminum and steel hinders the market growth. Additionally, the rising demand of its substitute packaging materials such as paper and plastic are expected to hinder the market growth. As an innovative strategy, manufacturers are focusing towards the development of product by using advance technology, which include lucrative graphic design on the can surface, easy open lids above the top, etc. Moreover, the metal can manufacturers are also taking initiatives for the production of eco-friendly metal cans to improve the recyclability rate.
