The global Aluminum Cold Plate market size is predicted to grow from US\$ 328 million in 2025 to US\$ 427 million in 2031; it is expected to grow at a CAGR of 4.5% from 2025 to 2031.

Liquid cold plates allow the cooling of the most of electronic components thanks to the circulation of liquid inside of a metal plate. The contact between the plate and the component extract calories and transmit them to the fluid circulating into the canals. The plate can integrate a system of turbulators in order to improve the thermal exchange and the homogeneity of the temperature under the component.

Global core aluminum cold plate manufacturers include Boyd Corporation, Wakefield-Vette etc. The top 1 company hold a share about 32%. Asia Pacific and North America are the largest market, with a share about 75%, followed by Europe with the share about 18%. In terms of product, formed tube cold plate is the largest segment, with a share over 32%. And in terms of application, the largest application is high power electronic equipment, followed by power conversion equipment.
