## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The outside of the Aluminum Foil Thermal Insulation Bag is aluminum foil and the inside is non-woven fabric. Heat reflection means that the foil-like inner layer of the bag reflects the food's radiant heat energy back, rather than absorbing it and letting it escape the bag. As a result, the food inside retains its original temperature, flavor and moisture longer than a regular bag.
