Aluminum packaging is also lightweight and cost-effective, making it a popular material choice for pharmaceutical manufacturers. Common types of aluminum pharmaceutical packaging include sachets, tubes, and vials.

Aluminum pharmaceutical packaging has the characteristics of high corrosion resistance, anti-oxidation, airtightness and airtightness, which can effectively protect the stability and active ingredients of medicines, and at the same time prevent the external environment from polluting and affecting medicines. Therefore, aluminum pharmaceutical packaging has been widely used in the pharmaceutical industry and has gradually become the standard packaging material for the pharmaceutical industry. With the continuous development of medical technology, the aluminum pharmaceutical packaging market is also expanding rapidly. According to market research, in the next few years, the aluminum pharmaceutical packaging market will maintain steady growth and gradually replace the application of traditional glass and plastic materials in certain fields.
