Aluminum solder paste is the basic flux for soldering aluminum and aluminum alloys with lead-tin-based solder, as well as welding aluminum with copper, steel, copper alloys and other metals. It can be used for welding aluminum enameled wires, aluminum plates, and aluminum lamp holders in the electronics industry. Its main function is to remove the oxide film on the metal surface, increase the wettability of the solder on the metal surface, and make the solder and the metal substrate welded together.
