The global Ambulatory Infusion Therapy Services market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Infusion therapy involves the administration of medication through a needle or catheter. It is prescribed when a patient's condition is so severe that it cannot be treated effectively by oral medications.

Ambulatory infusion therapy is a flourishing nationwide trend. Due to a confluence of health care trends, such as an upsurge in specialty medications that require expert-level administration, a population increasing in age, and steep health care costs, a challenging, but lucrative opportunity for pharmacies and pharmacists alike has begun to emerge.

The leading players mainly are Option Care Health, Coram CVS, UnitedHealth Group, HCA Healthcare, McLaren, CHI Health, Accredo Health, PharMerica, Cleveland Clinic, etc. The market is very fragmented because of numerous hospital outpatient infusion services and clinic services
