According to our LPI (LP Information) latest study, the global Amino Acid Surfactants market size was valued at US\$ 712.5 million in 2023. With growing demand in downstream market, the Amino Acid Surfactants is forecast to a readjusted size of US\$ 1609.3 million by 2030 with a CAGR of 12.3% during review period.

The research report highlights the growth potential of the global Amino Acid Surfactants market. Amino Acid Surfactants are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Amino Acid Surfactants. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Amino Acid Surfactants market.

Surfactants are chemical products consumed in large quantities every day on a worldwide scale. The development of less irritant, less toxic, consumer-friendly surfactants is, therefore, of general interest. Amino-acid-based surfactants constitute a novel class of surfactants produced from renewable raw materials and can be seen as an alternative to conventional surfactants.

In the report, we cover amino acid surfactants data by actual data instead of concentration conversion. Since amino acid surfactants have too many product forms and types, it may not be appropriate to convert by 30% solution or 100% active ingredient. Most amino acid surfactants solution has an active ingredient of 30-50%, and solid amino acid surfactants typically have an active ingredient of over 95%.

Global Amino Acid-based Surfactants main manufacturers include Ajinomoto, Sino Lion and Changsha Puji, totally accounting for 30% of the market. China is the largest market, with a share over 58%. As for the types of products, it can be divided into glutamic acid based surfactant, glycine based surfactant, sarcosine based surfactant, alanine based surfactant and others. The most common type is glycine based surfactant, with a share over 35%. In terms of application, it is widely used in facial cleaner, shower gel, shampoo and others. The most common application is facial cleaner, which accounts for 70% of all.
