The global Ammonia Filling Machine market size is predicted to grow from US\$ 188 million in 2025 to US\$ 286 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

In 2025, global production of ammonia filling machines reached 13,000 units, with an estimated average selling price of US\$14,820 per unit. Ammonia filling machines are automatic refrigerant filling devices for industrial refrigeration, central air conditioning, chiller units, heat pumps, freezers, ice makers, and refrigeration equipment production lines. 'Ammonia' primarily refers to R717 ammonia refrigerant/liquid ammonia refrigerant. The equipment typically integrates a vacuum pump, booster pump, refrigerant storage and supply unit, mass flow meter/weighing module, filling gun, recovery unit, PLC/touch screen, data traceability system, leak detection, explosion-proof electrical components, and safety interlocks. It is used to complete vacuuming, pressure holding/leak detection, dehydration verification, quantitative filling, residual gas recovery, and production line data recording during the refrigeration system's factory delivery or maintenance process. Its applications are mainly concentrated in cold storage, food cold chain, beer and beverage, chemical process cooling, pharmaceutical cooling, data center cooling, central air conditioning, commercial air conditioning, heat pump water heaters, air source heat pumps, chiller units, ice-making equipment, and the manufacturing of freezers and refrigerators. The upstream of the industry chain includes vacuum pumps, booster pumps, refrigerant pumps, compressors, flow meters, weighing sensors, valves and fittings, filling guns, pressure/temperature sensors, leak detectors, explosion-proof electrical components, PLCs, servo controls, industrial software, and machine frame sheet metal. The midstream consists of companies producing refrigerant filling, recovery, leak detection, and production line automation equipment. The downstream comprises manufacturers of air conditioners, heat pumps,

industrial refrigeration units, freezers, ice makers, water chillers, and cold chain equipment. Gross profit margins range from approximately 20% to 40%.
