The global Ammonium Nitrate market size is predicted to grow from US\$ 5114 million in 2025 to US\$ 5592 million in 2032; it is expected to grow at a CAGR of 1.3% from 2026 to 2032.

Ammonium Nitrate is a chemical compound with the formula NH_4NO_3 . It is composed of nitric acid and salt of ammonia. In room temperature, ammonium nitrate appears in a white crystalline form and it is also colorless. These crystals are rhombohedra in shape but when they are subjected to temperatures above 32 degrees Celsius, they change to monoclinic crystals.

The ammonium nitrate market is driven by demand from both agriculture and industrial sectors. In agriculture, rising global food demand and the need to improve crop yields continue to support consumption of nitrogen-based fertilizers, including ammonium nitrate. In industrial applications, steady demand for mining, quarrying, infrastructure construction, and energy development sustains the use of ammonium nitrate in explosive formulations. In addition, ongoing investment in mining and infrastructure projects in emerging economies provides a long-term demand base. Although stricter safety and regulatory controls in some regions influence market dynamics, ammonium nitrate remains a fundamental input in both agricultural and industrial value chains, supporting overall market demand.

Global key players of Ammonium Nitrate include EuroChem, CF Industries, Uralchem, Acron and Ostchem Holding, etc. Top five players occupy for a share about 40%. Europe is the largest market, with a share about 33%, followed by China and North America. In terms of product, Ammonium Nitrate Solid is the largest segment, with a share over 66%. In terms of application, Industrial Explosive is the largest market, with a share over 56%.
