Amprolium Hydrochloride is a vitamin B1 analogue which gives its action by competitively inhibiting uptake of thiamine. It is categorized as a coccidiostat which is used for the prevention and treatment of coccidiosis in both human and animals. Animal coccidiosis is usually caused by *Eimeria tenella*, *Eimeria necatrix* in several animals like sheep, chickens, goats, calves, turkeys. Here, due to taking Amprolium Hydrochloride, the coccidia gets thiamine deficiency and this in turn kills them.
