Amyl acetate is an organic compound and having molecular formula $C_7H_{14}O_2$, it is colourless liquid and having odour like a banana. Amyl acetate have strong electrical resistivity for the coatings which are electrostatically spread. Amyl acetate is manufactured by fermentation process between acetic acid and amyl alcohol. On the basis of solubility, slightly soluble in water and almost completely soluble in most of the solvents. Amyl acetate available in natural as well as in synthetic form. It is used to prepare more than forty synthetic flavours such as, apple, coffee, etc. In addition to this, amyl acetate is used as a low toxic solvent for nitrocellulose lacquers. It can be produced by yeast during fermentation. Amyl acetate makes it popular to end user industries due to its beneficial application such as, pleasant odour, low toxicity and it is test effectiveness so that it can be used in respirators. Amyl acetate is a multifunctional compound for the end use industries.

The global amyl acetate market is estimated to gain traction significantly due to the constant increasing demand from the end use industries which manufacture paints & coatings, flavours & fragrance, etc. Positive growth in investments by retailers to increase manufacturing capabilities and multiply their distribution network in many multiple folds to attract more consumers is one of the key factors for the growth global amyl acetate market. The market is driven by the demand for paints & coatings. Another key factor expected to boost the amyl acetate market is the growth in usage of advanced technology, which supports producers to improve amyl acetate. The product has already replaced several other products owing to the increase in number of applications it possesses. Demand from the flavours industry is expected to be the key driver of the amyl acetate market, as amyl acetate can be used mostly in varnish application and removal owing to its decent solvency. Over the recent past, demand for amyl acetate has witnessed a steady growth. Moreover, the trend is expected to continue during forecast period. As such, in order to better cater to the growing demand for amyl acetate from end-use industries such as Cosmetics & Personal Care and personal care from regions across the globe, manufacturers are focused on strategically expanding their capacities. The only restraint can hamper the growth of the market is, price of amyl acetate tend to be significantly higher, almost twice the price of traditionally used alternatives and conventional acetate. Thus, relatively higher prices of these amyl acetate are in turn expected to act as impediment to the growth of global amyl acetate market during forecast period
