The global Analytical Grade Ion Exchange Resin market size is predicted to grow from US\$ 823 million in 2025 to US\$ 1156 million in 2031; it is expected to grow at a CAGR of 5.8% from 2025 to 2031.

Analytical grade resins are available as both strong and weak cation and anion exchangers and as mixed-bed ion exchangers. Many are available in several ionic forms and can be converted.

Analytical grade ion exchange resins are used in water treatment applications for the removal of contaminants, such as heavy metals and ions. The growing concerns about water quality and the need for safe drinking water were driving the demand for ion exchange resins. The pharmaceutical and biotechnology industries use analytical grade ion exchange resins for purification and separation processes, including the purification of pharmaceutical compounds, proteins, and nucleic acids. The expansion of these industries contributed to market growth.
