The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Andalusite market size was valued at US$ 150.1 million in 2023. With growing demand in downstream market, the Andalusite is forecast to a readjusted size of US$ 227.7 million by 2030 with a CAGR of 6.1% during review period.

The research report highlights the growth potential of the global Andalusite market. Andalusite are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Andalusite. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Andalusite market.

Andalusite is an aluminum nesosilicate mineral which belongs to sillimanite family and is generally found in metamorphic rocks. It is a polymorph of two minerals including sillimanite and kyanite. Being polymorphic in nature, it has a chemical composition which is similar to sillimanite and kyanite with dissimilar physical structure.

Asia Pacific is expected to be the one of the largest andalusite market owing to the growing demand for refractoriesinthe region, particularly in emerging economies including India and China. At present, China is the key producer and consumer of refractories, primarilyfueled by the presence of a robust steel industry. Vietnam, Philippines, Indonesia, Turkey and Russia are potential andalusite markets which are expected to grow and sustain over the next seven years. Latin America is anticipated to witness significant growth over the forecast period owing to the growing demand for andalusite-based cement refractories on account infrastructure development in the
