The global Anthraquinone Disperse Dyes market size is predicted to grow from US\$ 319 million in 2025 to US\$ 419 million in 2031; it is expected to grow at a CAGR of 4.7% from 2025 to 2031.

Anthraquinone disperse dyes lack the water-solubilizing groups of the acid dyes, but they are adsorbed by hydrophobic fibres such as nylon or acetate rayon with the aid of soap or other agents that keep the dye suspended in the application bath.

The Disperse Dye Market size is forecast to reach around \$9 billion by 2027, after growing at a CAGR of 5.5% during 2022-2027. Disperse dyes are non-ionic dyes, which has low water solubility and exists in water primarily in a highly dispersed state. These dyes are primarily used for dyeing hydrophobic fibers such as polyester, nylon, and acrylic. The major driving factors for disperse dye market are growing consumer demand for color variants in various product categories and growth in end user industries. Surging usage of disperse dyes in the textile industries is expected to impel the global disperse dyes market size. Disperse dyes are also used as a colorant in plastics. The flourishing automotive industry and uses of polyester in various automotive upholstery, further drives the global disperse dyes market share.
