Blue masterbatch is a type of colour masterbatch, a typical grade of masterbatch. Plastic beads - Masterbatch (MB) is a solid plastic additive to plastic used to color the plastic (color masterbatch) or impart other properties to the resin (additive masterbatch). A masterbatch is a concentrated mixture of pigments and / or additives that are encapsulated in a thermosetting process into a carrier resin, which is then cooled and cut into granules. Masterbatch allows the processor to economically color the raw polymer in the plastic manufacturing process. Blue masterbatch is a mixture of concentrates in granular form from base resin, blue pigment and plastic additives.
