Anti-cancer insurance is a kind of critical illness insurance, and anti-cancer medical insurance is a kind of medical insurance. The biggest difference is that it will be compensated once a diagnosis is made, and the other is that only medical expenses related to cancer are reimbursed. Compared with the anti-cancer medical insurance, the anti-cancer insurance has a longer-term and lasting protection, and the rate is constant, so there is no need to worry about renewal. Therefore, my answer to the senior sister focused on the analysis of cancer prevention insurance. The coverage of cancer prevention insurance is much smaller than that of critical illness insurance. It only targets malignant tumors, but it can also cover the highest incidence of serious illnesses.
