The global Anti-colic Bottle for Newborns market size is predicted to grow from US\$ 640 million in 2025 to US\$ 925 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global Anti-colic Bottle for Newborns production reached approximately 105.4 million units, with a unit price of 6.21 USD per unit.

Anti-colic Bottle for Newborns is a specialized baby feeding bottle designed to reduce the amount of air a newborn ingests during feeding, thereby minimizing gas, colic, and discomfort. These bottles typically incorporate venting systems, such as internal valves or multi-hole nipples, that allow air to flow into a separate chamber rather than mixing with the milk. The bottles are made from safe materials suitable for infants, including BPA-free plastic, Tritan, glass, or silicone. Upstream, the production involves raw materials like medical-grade plastics, silicone, and glass, as well as precision manufacturing components for valves and nipples. Downstream, these bottles are used by households, hospitals, nurseries, and daycare centers, and are distributed through e-commerce platforms, retail baby stores, supermarkets, and pharmacies.

The global market for Anti-colic Bottles for Newborns has been steadily growing due to increasing awareness among parents regarding infant health and digestive comfort. Rising rates of nuclear families and working parents have further driven demand for convenient and reliable feeding solutions. Innovations in bottle design, such as improved venting systems, ergonomic shapes, and materials that are safer and easier to clean, are encouraging adoption across various regions. Retail expansion, particularly through e-commerce platforms and specialty baby stores, has made these bottles more accessible to consumers. The market is highly competitive, with

established brands offering differentiated products that emphasize anti-colic efficiency, material safety, and user convenience. Emerging markets also present opportunities due to rising disposable income and growing attention to infant care standards.
