The global Anti-Collision Buffer Cars market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The anti-collision car buffer car is placed at the back of the operation for the safety of high-speed maintenance and road rescue operations. If a vehicle does not see the construction area and collides with it, the anti-collision buffer car can absorb the impact energy.

According to the survey data of the company's 'Construction Machinery Research Center', the total sales of the top 50 global construction machinery manufacturers will reach 230 billion US dollars in 2022, and Asian companies occupy an absolute advantage, accounting for 50% of sales revenue, followed by Europe, Sales revenue accounted for 26%, and North America accounted for 23%. The world's top 50 mainframe manufacturers of construction machinery will sell about 1.2 million construction machinery equipment in 2021, and the sales volume will increase by 9%. China is currently the largest factory machinery market in the world. In 2022, the sales of construction machinery companies will account for 24% of the total sales, which is the country with the highest proportion. According to the China Machinery Industry Federation, the operating income of the construction machinery industry will drop by more than 12% in 2022. In 2022, the operating income of China's construction machinery industry will be 797.7 billion yuan. China's annual export volume will reach 44.3 billion US dollars, and the export volume will increase in two years amounted to US\$23.3 billion.
