An Anti - Static Foam Shipper is a specialized packaging solution designed to protect sensitive electronic components, circuit boards, and other static - prone items during shipping and handling. It is made from foam materials with anti - static properties, which can effectively prevent the generation and accumulation of static electricity. This helps to avoid electrostatic discharge (ESD) that may damage delicate electronic devices. The foam shipper usually has a cushioning structure, which can provide physical protection to the items inside, reduce the impact and vibration during transportation, and at the same time ensure the safety of the items from electrostatic hazards. It is widely used in the electronics industry and other fields that require anti - static protection.
