Anti-UAV weapon, also known as an anti-drone gun, is a device specifically designed to remove unwanted drones from the air. It can be used for a variety of applications, including security, privacy protection and protection against drones that are dangerous or flying in the air uninvited. The weapon works through electromagnetic radiation that can damage the drone's electronics and interfere with the connection between the drone and the controller. This interference can result in the loss of control over the drone, causing it to fall out of the sky.
