The global Antibody-siRNA Conjugates market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Antibody-siRNA conjugates combine the specificity of antibodies with the gene-silencing ability of siRNA, creating a targeted approach for delivering siRNA to specific cell types or tissues. By conjugating siRNA to monoclonal antibodies that recognize specific surface markers on diseased cells, this approach minimizes off-target gene silencing and enhances therapeutic efficacy. This conjugate system has been particularly useful in oncology, where siRNA can be delivered directly to cancer cells.
