Antibacterial fiber is a kind of textile which uses antibacterial agent on the surface or inside of fiber. Antibacterial fiber has antibacterial and bactericidal functions against *Staphylococcus aureus* of methoxybenzylpenicillin, and can prevent infection and infection. The mixed type is prepared by spinning the heat-resistant inorganic antibacterial agent such as ceramic powder containing silver, copper and zinc ions into polyester, polyamide or polyacrylonitrile; the post-treatment type is prepared by impregnating the natural fiber with organic antibacterial agent such as quaternary ammonium compound or fatty imide. Used for hospital textiles such as clothes, bed sheets, coverings, curtains, pantyhose, socks and bandages
