An antistatic gun is a machine that neutralizes the static charge of an object. It neutralizes the static charge of an object by ionizing the air and discharging it along with the air toward the object. It is also called a static eliminator gun because its role is similar to that of an ionizer gun type. Since high-pressure air is released onto the object, it is possible to remove dust attached to the object as well. They are used in painting and manufacturing to remove dust caused by static electricity.

The global Antistatic Gun market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
